## Projects

---

### Jagodana abhi LLC, React.js project ↗

Technologies Used : HTML , Tailwind Css , Javascript , React.js

Maximize your productivity and transform your digital presence with our innovative automation and custom development services tailored to your business.

### The Loan Compass, Next.js Project ↗

Technologies Used : HTML , Tailwind Css , Javascript , Next.js

### Car Rental, Mini Project, Technologies Used: PHP, MySQL, HTML, CSS, JavaScript

09/2024 – 10/2025

Developed a dynamic and responsive Car Rental Management System that allows customers to browse, book, and manage car rentals online. The system streamlines the rental process for both users and admins, enhancing user experience and operational efficiency.

- User Registration & Login: Secure user authentication system

- Car Listings: View available cars with details like model, price, fuel type, and image
- Booking System: Rent a car by selecting pickup and return dates
- Booking History: Users can view their previous and current bookings
- Admin Panel: Add/edit/delete car listings, manage bookings and users
- Search & Filter: Users can search cars based on type, brand, or cost
- Responsive UI: Mobile-friendly and clean interface using HTML, CSS, and JS
- Database Integration: MySQL used for storing user, car, and booking data

### **Internet Banking,**

01/2025 – 04/2025

*Final Year Project Technologies Used: PHP, MySQL, HTML, CSS, JavaScript*

Developed a secure and user-friendly Internet Banking System that allows users to manage their banking activities online. The system enables account holders to view account details, transfer funds, check transaction history, and update profiles securely.

- User Authentication: Login/logout functionality with session management
- Account Dashboard: View balance, recent transactions, and personal details
- Fund Transfer: Transfer money between accounts with validation
- Transaction History: View and filter past transactions by date or type
- Admin Panel: Manage users, approve accounts, and monitor system activity
- Responsive Design: Mobile-friendly layout using HTML, CSS, and JavaScript
- Database Management: MySQL used to store user data and transaction logs

### **Additional Information**

---

- Completed academic and mini
- Attended workshops on
- Participated in college-level projects in Web Development, Cybersecurity, Cloud hackathons and coding Banking, and Rental Systems Computing, and Software challenges Testing
- Actively learning through platforms like GeeksforGeeks,
- Created and hosted a personal HackerRank, and W3Schools portfolio website to showcase projects
